FRANK'S CORNER

Increase profitability and productivity of your track loader up to 30% by selecting the right track for your work environment.

McLaren is your One-Stop-Shop for CTL rubber tracks. We've got the right track for any application.

OEM Classic Patterns

C Pattern – Classic OEM Track, general all around performance. Built with premium materials to match or surpass your original OEM track.

Block Pattern - Classic pattern OEM Track, general all round track. Built with premium materials to match or surpass your original OEM track.

OEM Performance Patterns

TDF - The original MBL track manufactured by McLaren for over a decade. World recognized high performance pattern for superior traction in mud, snow and other slippery conditions. McLaren's NextGen TDF track is an all- season track that performs great in all conditions, including on and off-road. The tread is designed to contain the growth of cuts and cracks thus ensuring a longer life of the track.

TDF Super Series – The new and improved version of our original NextGen TDF track. Excellent wet traction, best performer in snow and great tread wear on hard surfaces.

ZigZag - OEM Performance pattern track, built with premium materials and designed to provide excellent traction on slippery terrains such as wet mud and clay. Not recommended for rocky terrains.

OEM Specialist Pattern

Turf and Demo- OEM-quality specialty track with smooth pattern for landscaping and demolition. The *Turf and Demo* tracks are designed for companies working 80 % of the time on lawns or demolition sites. The smooth pattern prevents lawns from getting damaged when laying sod. The full track body will minimize tread void and also protects the tracks when used in heavy demolition-breaker work. This would also be the preferred option when used on hard surfaces in a recycling yard. Non-marking option also available.

OEM Superior Performance Pattern

The Terrapin - McLaren's Terrapin was designed to be the most Versatile Rubber Track on the Market

No trade-off between great traction, a smooth ride, and excellent durability even in severe rocky conditions. You can have excellent traction in snow and sand and still be able to cross lawns and other sensitive areas with minimal disturbance. The Terrapin tread design outperforms all other tread designs on the market and qualifies as the best all-around performer with the longest life in rocky conditions!
